-A Commission," presumably of experts, appointed by the French Society of Hygiene, has studied the condensed milk question, and reports that when it is diluted with twice or four times its weight of water it may in some cases be useful as a food for infants, but is always to be considered "incontestably inferior to good cow's milk." -Health Monthly.

The dredging of South Carolina rivers for phosphates is a new industry of considerable importance to the territory surrounding Charleston. Some of the crude rock is shipped to Europe, but most of it is ground at home before it goes to market. At the present time the demand is great, and all the companies are working on full time. Chicago Herald.

-An organization has been incor-porated in New York, under the name of the National Horse Show Association of America, with a capital of \$100,000, in shares of one hundred dollars each. er can at least in part protect his This association will hold its first show of horses next fall. at which time it is announced liberal premiums will be offered for all classes of horses. It is expected that this will be the largest and | better for a frequent stirring of the surmost notable exhibition of horses held in this country, and will occupy the during the growing season, and no crop same position here that the horse shows is subjected to such slovenly manageheld at the Agricultural Hall, London, do in England .- N. Y. Sun.

-A company has been formed in road train, and seeing cornfield after New York, it is stated, with a capital of cornfield with the weeds growing as high \$4,250,000, for constructing a pneumatic tube between that city and Chicago for the purpose of transmitting letters, grain samples, jewelry, and other small, light packages. Way stations things in regard to the proper methods will be established at Cleveland, Buffalo, and other points. The pipes will be satisfactorily or authoritatively settled. of iron, four inches in circumference, and the cost of laying them is estimated at \$1,000 per mile. The price for car-riage will be five cents for letters and ten cents for parcels; and the boxes holding the goods will make the trip between the two points, it is believed, in four hours. -N. Y. Herald.

HOME AND FARM.

-A cool, dark stable is preferable for cows to a hot pasture in midday. -A quart of good milk should weigh about 2.15 pounds, or nearly 2 pounds

21 ounces .- Cincinnati Times. -For table use, currants can not be too ripe, but for jelly-making, the case is different. They should be picked as soon as they are fairly red. - Chicago Herald.

-The officers of the Department of Agriculture say that hog-cholera is practically exterminated. For more than a month the department made unsuccessful efforts to secure virus from infected hogs for experimental purposes. - Chicago Tribune.

-Jumbles which will keep a month are made thus: One pound of butter, one pound of sugar, two pounds of flour, three eggs, nine teaspoonfuls of water, three of baking powder, with salt and flavoring to suit the taste. Roll them,

and bake in a quick oven. -Clover must not be allowed to get too ripe before it is cut, or it will lose all the leaves in handling, and there will be nothing left for the cattle to cat but dry stalks like sticks. The time to cut is when one-third of the blossoms begin to turn brown .- Prairie Farmer.

-To move an old bull without danger of his hooking, bring his nose high financially, but the man at this end in the air by a check-rein attached to should reflect, as he listens, that his the ring in his nose, and passed under a belly-band and made fast to a crupper. This will secure the attendant from all accidents, and will not hurt the bull in the least. Try it .- New England

-No ordinary amount of drying will prevent hay from becoming musty if ventilation is shut off during the sweating process. If a hole is cut through the floor at the bottom of the mow near the center and under a ventilator in the roof, and a barrel placed over it and drawn up as the hay is mowed in, thus leaving a hole from bottom to top, evaporation will be facilitated and the quality of the hay improved. - Ohio Farmer.

-The secret of success in making white sponge-cake is the thorough mixing of the ingredients. The flour should e sifted, in the first place; then sift the flour and sugar together, then the one small feaspoonful of baking powder. For one loaf use eleven eggs-the whites only are required-one large cup of flour, and one and a half of sugar. If possible do not open the oven door while the cake is baking.—Exchange.

The Improvement of the Corn Crop.

Corn is the king crop of this country. Its aggregate yearly product is about double that of all other grain crops of the country combined. No other crop serves so many purposes as food for man and animals. It is also the staple for whisky, and to some extent is superseding barley in the production of beer. Our crop last year, regarded as a short crop, aggregated 1,600,000,000 bushels, while the total of the crops of wheat, while the total of the crops of wheat, oats, rye, and barley were but \$13,000.from a parrot cage, where he had been have above described, they caused me an-000 bushels. It adapts itself to nearly every condition of soil and climate from Maine to Texas and from Lake Superior to the Gulf of Mexico.

There is no other crop of which the

vield per acre varies so much according to the condition of the soil and the cultivation given it. By special preparation of the soil and extra culture crops of over 100 bushels per acre-have been grown, showing what the capabilities of the crop are. But as shown by the statistician of the Department of Agriculture for the last ten years the average product per acre for the entire country has been but twenty-six bushels. per acre of ordinary field culture may probably be placed at seventy and ten bushels, though not unfrequently farmtake the place of bridges.—N. Y. the average yield last year our corn crop would have been nearly 2,400,-000,000 instead of 1,600,000,000 bushels. There is no doubt that within the next ten years the farmers of the country could easily bring up the average yield to at least forty bushels per acre. Most of the causes of light yield are within the power of the farmer to remove. They are poor soil and seed, slovenly preparation of the grounght and after culture, wet weather, drought, intense frost, the ravages of destructive insects, and destructive storms. Of these all but the three last are either wholly or measurably under control of the farmer to remedy. If the soil is poor feed it with stable manure, clover or other green manure, or the commercial fertilizer. It can soon be brought into good condition. Poor seed is inexcusable unless as in the past year in many parts of the country the germinating power of the corn is injured. In ordinary seasons selection of seed at the proper time and the eareful housing of it will insure good seed. Thorough tile drainage is an effectual insurance against loss by drowning out, and almost equally so from injury by drought. Frosts and destructive storms are beyond human control, but our agricultural entomologists will probably be able to point out methods by which the farmerops from insect ravages. The most

TORNADOES.

Scientifically Accounted for, and Some Remote Causes that Produce Painful Besults Explained.

The following synopsis of a lecture delivered by Dr. Horace R. Hamilton before the New York Society for the Promotion of Science contains so much that is timely and important that it can be read with both interest and profit:

There is probably no subject of modern times that has caused and is causing greater attention than the origin of torna "Nevertheless," said Miss Positive, does. Scientists have studied it for the "I think him the lowest kind of a hu- benefit of humanity; men have investigated it for the welfare of their families. It has been a vexed subject long considered, and through all this investigation the mistakable that authority was used, to cyclone has swept across the land carrying which the child of eight responded by destruction to scientists as well as to the innocent dwellers in its track. One thing, however, is certain; the cause of the cy-clone must be sought far away from the whirling body of wind itself. Its results Savages belonged to the lowest order or kind of men. Explanations of the matter were received with only a sly twinkle to show whether the child really is invariably preceded by dark spots upon the face of the suc. These spots, indicating a disturbed condition of the solar regions necessarily affect the atmosphere of our earth. An unusual generation of heat in one part of the atmosphere is certain to cause a partial vacuum in another portion. Air must rush in to fill this vacuum. With the most perfect assumption of parental mildness, she answered: This theory finds additional confirmation in the fact that tornadoes come during the day and not at night. The dark spots upon day and not at night. The dark spots upon the surface of the sun, whatever they may Dr. Best is very clever, but he says her arguments, though short and salutary, are often unanswerable. Over tary, are often unanswerable. Over the present season can be accounted for hearing another discussion between on precisely this basis. Is it reasonable father and grandmother, in which her to suppose that the marvelous effect of the father slightly disputed some Biblical sun on vegetation and life in general shall statement, she said, in the most winning be less than upon the atmosphere itself through which its rays come? The cause is remote, but the effect is here. After describing some of the terrible effects of the cyclone, the speaker went on

> This rule finds its application in nearly every department of life. An operator is in San Francisco—the click of the instrument manipulated by his fingers, in New York. The President makes a slight stroke of the pen in his study at the White House, and the whole nation is aroused by the act. An uneasiness and disgust with everything in life, commonly called home-sickness, is felt by many people, when the cause is to be found in the distant home thousands of day the feeling increases. There are added symptoms. They continue and be-come more aggravated. The slight pains in the head increase to agonies. The nausea becomes chronic. The heart grows irregular, and the breathing uncertain. All these effects have a definite cause; and, Very true. Neither have we any evidence that there is a tornado on the surface of

the ropes. The keeper rushed to the health, weighing more than 200 pounds. the station. He took the next train for such aggravated symptoms. It never oc Wilmington, where he confidentially curred to me that analysis would help said to a friend: "Chinamau heaplee solve the trouble, as I did not presume my foolee, alle same like Melican man. Me washee alle time now."—Philadelphia Record.

difficulty was located in that portion of the body. But I continued to grow worse. I had a faint sensation at the pit of my stomach nearly every day. I felt a great desire to eat, and yet I loathed food. I was existence is far worse than death, for which

broke his neck. He died in a few mo ments advised me to make a final attempt to recover my health. I sneered inwardly at his suggestion, but I was too week to make any resistance. He furnished me with a remedy, simple yet palatable, and within the contraction of the contraction two days I observed a slight change for the better. This awakened my courage. I felt that I would not die at that time. I continued the use of the remedy, taking it in accordance with directions, until I became not only restored to my former health and strength, but of greater vigor than I have before known. This con-dition has continued up to the present time, and I believe I should have died as miserably as thousands of other men have died and are dying every day had it not been for the simple yet wonderful power of Warner's Safe Cure, the remedy I em-

It was while suffering thus that a friend

I confess I carnestly longed.

The lecturer then described his means of restoration more in detail, and concluded

as follows: My complete recovery has caused me to investigate the subject more carefully, and I believe I have discovered the key to most ill-health of our modern civilization. I am fully confident that four-fifths of the diseases which afflict humanity might be avoided were the kidneys and liver kept in perfect condition. Were it possible to con-trol the action of the sun, cyclones could undoubtedly be averted. That, however, is one of the things that can not be. But I rejoice to say that it is possible to control the kidneys and liver; to render their ac-tion wholly normal and their effect upon the system that of purifiers rather than poisoners. That this end has been accom plished largely by means of the remedy I have named I do not have a doubt, and I feel it my duty to make this open declara-tion for the enlightenment of the profes-sion and for the benefit of suffering humanity in all parts of the world.

GOOD NEWS FROM TEXAS.

Mr. THOMAS A. HOWARD, of Honey Grove, Fannin

County, Texas, under date of April 5, 1883, writes as "I have been suffering during several years from severe illness, and a general breaking down of my physical system, and have tried the treatment and prescriptions of many doctors far and near, and traveled to the Hot Springs and other mineral springs famous for their remediai qualities, drinking the waters and bathing systematically in their healing depths, but all to no avail, as I steadily failed in health; and although informed by my physicians that my allments and weaknesses were the result of kidney disease of a dangerous character, they could give me nothing to cure me, During the past two years my sufferings at times were dreadful, and I had the most indescribable pains in the paroxysms were so severe as to render it impossible for me to sleep. While in this deplorable and discouraged condition I was persuaded to try Hunt's Remedy, and after using less than half a bottle my great sufferings and paroxysms of pain were entirely relieved, and I could sleep better and longer than I had in two years before, and although I am now on my third bottle only my im provement is very remarkable, and I regret that I did not know of the wonderful curative powers of Hunt's Remedy before, as it would have saved me years of suffering. I heartfly recommend it to all afflicted with any k ducy disease or disease of the urinary organs,"

HIT MY CASE EXACTLY."

Please allow me to speak in the highest terms of "Hunt's Remedy," for it hit my case exactly. I had kidney and urinary trouble pretty bad. I was recommended Hunt's Remedy. I took one teaspoonful as itrected. I felt a decided change at the first dose. I took two bottles, and have felt like a new man ever since. Please receive the sincere thanks of myself for the benefits which I sought vainly for and found only

in Hunt's Remedy.
"I will cheerfully give this same opinion of Hunt's Remedy to any one who wishes it, by addressing "ROBERT D. ARCHER. 'S11 Linnard Street, Philadelphia

"My mother drove the paralysis and neuralgia all out of her system with hop bitters."—Ed. Oswego Sun.

—Keep the kidneys healthy with hop bit-

ters and you need not fear sickness. -Ice water is rendered harmless and more refreshing and reviving with hop bitters in each draught.

-The vigor of youth for the aged and infirm in hop bitters!

- 'At the change of life nothing equals
Hop bitters to allay all troubles incident

-"The best periodical for ladies to take monthly and from which they will receive the greatest benefit is hop bitters."

—Mothers with sickly, fretfut, nursing children, will cure the children and benefit themselves by taking hop bitters daily.

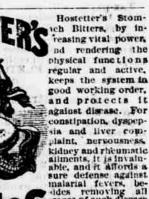

—Thousands die annually from some form of kidney disease that might have been prevented by a timely use of hop bitters. -Indigestion, weak stomach, irregularities of the bowels, can not exist when hop

bitters are used.

—A timely buse of hop Bitters will keep a whole family In robust health a year at a little cost. -To produce real genuine sleep and childlike repose all night, take a little hop bit-

ters on retiring. -That indigestion or stomach gas at night, preventing rest and sleep, will disap-

pear by using hop bitters. -Paralytic, nervous, tremulous old ladies are made perfectly quiet and sprightly by using hop bitters.

physical functions regular and active. good working order, and protects it against discase. For constipation, dyspep-
